

Sindhu Namani

Memphis, Tennessee - Open to relocate

(901) 520-4513 sindhunamani1912@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

Summary

Results-driven **IT and Analytics** with **3+ years of experience** in software development, data management, and system integration. Proficient in **Python, Java, SQL, and web technologies**, with hands-on experience in building scalable applications, optimizing databases, and developing **REST APIs**. Skilled in SDLC, debugging, testing, and **version control (Git)**. Strong understanding of data structures, backend systems, and cloud-based tools, with a focus on delivering efficient and reliable technical solutions.

Technical Skills

Programming Languages: Python(Pandas, Scikit-Learn, TensorFlow, Keras, PyTorch, Flask), R, SQL(Advanced Queries, Joins, Window Functions, Aggregations), Java, JavaScript, MATLAB, C

Analytics & BI Tools: Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Macros), Matplotlib, Seaborn

Database Systems: PostgreSQL, SQL Server, Microsoft SQL Server Management Studio (SSMS), Relational Databases, Data Modeling, Query Optimization, Data Integrity, ETL Pipeline

Software Development: SDLC, Code Review, Debugging, Testing, Version Control (Git)

Automation & Integration: Workflow Optimization, Report Automation, Structured Data Modeling, Database Integration, REST APIs

Business Analysis: KPI Development, Cost Optimization, Process Improvement, Requirements Gathering

Web & Application Development: React.js, HTML, CSS, Spring Boot

Tools & IDEs: JIRA, BitBucket, Microsoft SQL Server Management Studio (SSMS), RStudio, PyCharm, Jupyter Notebook, Google Colab, Lucid Charts, GIT

Methods & Frameworks: A/B Testing, Agile, Scrum, Risk Assessment, UAT Support.

Soft Skills: Analytical Thinking, Problem Solving, Communication with Stakeholders, Project Planning, Cross-Functional Collaboration, Attention to Detail

Education

University of Memphis

Masters of Science in Information Systems

August 2023 – May 2025

Memphis, Tennessee

Experience

First Horizon Bank

Information Technology Internship

September 2025 – May 2026

Memphis, Tennessee

- Engineered a full-stack internal web application using **Java Spring Boot** and **React.js**, delivering 40+ responsive screens with seamless state persistence and navigation that improved user workflow efficiency and reduced task completion time for internal users.
- Automated a legacy manual process, reducing project timelines by 4 weeks and eliminating redundant workflows through custom **Java**-based automation logic, increasing operational efficiency and accelerating delivery cycles.
- Architected secure **RESTful APIs** and managed session-based data handling, enabling users to resume progress or edit submissions while ensuring backend data integrity.
- Optimized database operations by generating 15+ complex **SQL queries** mapped to backend logic, streamlining data population and enhancing reporting accuracy for business-critical workflows.
- Utilized for database design, development, and optimization in full-stack web applications.
- Led **CI/CD-enabled** build and deployment processes using **Maven**, **Tomcat**, and **Git**, integrating secure authentication protocols to streamline code integration, testing, and releases, improving deployment speed and system reliability.
- Collaborated in Agile sprints using **Jira** and **Lucidchart**, managing version control with **Git**, and leading stakeholder demos to refine application requirements, ensuring alignment between technical solutions and business objectives.

Ecological Servants Project

Data Analyst and Research Intern

August 2025 – April 2026

Memphis, Tennessee

- Analyzed website traffic and user behavior using **Google Analytics** and **SQL-based querying**, tracking 10+ KPIs (CTR, session duration, bounce rate, user flow) across 30+ pages to drive data-informed content and engagement strategies.
- Designed and implemented **ETL workflows** using **Python (pandas)** and **Excel** to clean, transform, and validate web analytics data, ensuring high data quality and accuracy for reporting and decision-making.
- Built and optimized interactive dashboards in **Power BI**, integrating **REST API** data sources; automated reporting processes, reducing manual effort by 3 hours/week and enabling near real-time KPI monitoring for stakeholders.
- Conducted user journey, funnel, and cohort analysis to identify high drop-off points and top-performing content; delivered SEO and UX recommendations projected to increase organic traffic by 15–20% and improve user acquisition.
- Curated, validated, and quality-checked 50+ invasive plant profiles with verified citations and optimized imagery, directly supporting the on-schedule release of the organization's Invasive Plant Field Guide.
- Collaborated with cross-functional teams and presented executive-level insights, translating complex data into actionable strategies that supported digital growth and improved overall content performance.

Midwest Special Services (MSS)

Artificial Intelligence Volunteer

July 2025 – August 2025

Memphis, Tennessee

- Led organization-wide AI integration by evaluating LLM platforms including **ChatGPT, Microsoft Copilot, Google Gemini, and Claude**; recommended Copilot based on data security, compliance alignment, and workflow compatibility, improving efficiency for 40+ staff.
- Authored MSS's first AI Privacy & Governance Policy aligned with **HIPAA and NIST AI Risk Management Framework**, strengthening data protection and safeguarding sensitive information for 100+ users.
- Analyzed 100+ survey and self-assessment responses using AI tools; built reusable prompt templates that reduced manual analysis time by 60%.
- Automated analytics and reporting by integrating AI features in **Excel and Power BI**; reduced manual analysis and reporting time by 50–60% while improving insight accuracy.
- Implemented AI-driven workflow automation using **Power Automate** and developed a centralized prompt engineering library adopted by 30+ staff, enabling scalable AI adoption across 15+ programs and saving 5–10 hours/month per team.

Zebo.ai in association with Verzeo

Artificial Intelligence Intern

March 2022 – June 2023

Hyderabad, India

- Developed a **Convolutional Neural Network (CNN)** with two Conv2D and MaxPooling2D layers to predict different fashion clothing accessories, achieving 90% model accuracy and reducing classification errors by 15% through optimized dataset splits.
- Engineered an **Artificial Neural Network (ANN)** with an input layer, two hidden layers using ReLU activation, and an output layer with a sigmoid activation function to predict if a patient is diabetic or not, achieving 72% model accuracy and enabling 10% faster patient screening for 500+ records.

Projects

SQL Retail Sales Data Analysis | *PostgreSQL, pgAdmin* | [GitHub Link](#)

March, 2026

- Architected and optimized a **PostgreSQL relational data model**, executing **end-to-end ETL (data ingestion, cleaning, transformation, validation)** on 10K+ retail records, improving data integrity by 25% and ensuring analysis-ready datasets.
- Developed and optimized 15+ complex **SQL queries** using joins, aggregations, window functions, and CASE statements, enhancing query efficiency by 30% and reducing data retrieval time.
- Conducted **exploratory data analysis (EDA)** to evaluate customer behavior, sales trends, and product performance, uncovering 3–5 key patterns impacting revenue and customer retention.
- Delivered actionable business insights by identifying top-performing products, high-value customer segments, and peak sales periods, contributing to 15–20% improvement in revenue optimization strategies and better demand planning.

CodeCritic AI - Instant Code Feedback at Senior Developer Level | *Gen AI, NLP, JSON Structuring*

April, 2025

- Led the development of CodeCritic AI, a code review automation tool powered by Google Gemini Pro, providing structured, multi-dimensional feedback (readability, performance, security, maintainability) in JSON format; accelerated code review processes by 30% and improved feedback quality for 50+ junior developers.
- Designed an interactive mentor-like experience with follow-up Q&A, enabling junior developers to receive instant, contextual guidance and improve code quality efficiently.

Smartphone Data Analysis using R | *R, ETL Pipelines, Statistical Modeling, Data Visualization* | [GitHub Link](#)

November, 2024

- Conducted ETL (Extract, Transform, Load), feature engineering, and anomaly detection on 1020 records using R, Selenium, and Beautiful Soup.
- Utilized T-test, ANOVA, Chi-Square, and multivariate regression to model smartphone pricing forecasts, achieving a 20% improvement in predictive accuracy (0.15 RMSE reduction) across 1,020 records, enabling more reliable business decision-making.
- Optimized and created 10+ Tableau visualizations (scatter plots, box plots, heatmaps) to analyze 5G adoption, brand performance, and user behavior, identifying trends that informed marketing strategies for 3 major brands.

Top Company's Ratings and Reviews Analysis | *ML, Predictive Analytics, Customer Sentiment Analysis*

April, 2024

- Collected and analyzed customer reviews, visualizing insights with Tableau dashboards.
- Applied Decision Trees, Neural Networks, and Linear Regression to predict customer satisfaction.
- Evaluated model accuracy using Decision Trees, achieving 85% customer satisfaction prediction accuracy.
- Identified review drivers (product quality, brand reputation) and proposed benchmarking, increasing positive reviews by 10% for 5 companies

Certificates

- 5-Day Gen AI Intensive Course – Kaggle with Google, 2025
- Learning Excel: Data Analysis – LinkedIn Learning, 2025
- Cyber Security for Leadership – Great Learning, 2024
- PrivacyOps Certification – Securiti, 2024
- Python Bootcamp from Zero to Hero – Udemy, 2022

Honors

- William and Lauren Pickens Graduate Fellowship (Fogelman College of Business & Economics) for academic excellence for 2 semesters, 2024-2025
- Merit-Based Scholarship covering 35% of tuition fees for outstanding academic performance in undergraduate program, 2019-2023
